SIDDAGANGA INSTITUTE OF TECHNOLOGY, TUMAKURU LECTURE PLAN FOR THE ACADEMIC YEAR EVEN 2025 – 2026

Department of Information Science and Engineering

| Teacher | Mrs. Vidhya Shree N S | Dept. | Information Science and Engineering |
|---------|--------------------------------------|--------|-------------------------------------|
| Class | 7 th Semester - F section | Course | Software Testing (S7ISI02) |

| Cou | Course Learning Objectives (CLOs): This course will make to student to: | | | | | |
|-----|---|--|--|--|--|--|
| 1 | Understand the fundamental concepts of software testing. | | | | | |
| 2 | Explain the life cycle of the testing and explore various levels of testing. | | | | | |
| 3 | Gain knowledge on functional and structural testing methods. | | | | | |
| 4 | Explore the concepts of software testing and its application in various scenarios with the help different testing strategies. | | | | | |
| 5 | Understand and use testing tools and frameworks for various testing tasks. | | | | | |

| | | | | Teac | hing & L | earning S | Scheme | <u> </u> | |

| Sl. | Date | Topic | Remarks | | | | | |
|-----|--|---|---------|--|--|--|--|--|
| No. | | | | | | | | |
| | | UNIT 1 | | | | | | |
| 1. | 1/9/2025 | A Perspective on Testing, Examples: Basic definitions, Test | t | | | | | |
| | | cases, | | | | | | |
| 2. | 2/9/2025 | 025 Insights from a Venn | | | | | | |
| | | diagram, Identifying test cases, | | | | | | |
| 3. | 3. 4/9/2025 Error and fault taxonomies, Levels of testing, | | | | | | | |
| 4. | 4. 8/9/2025 Examples: Generalized pseudo code, The triangle problem, | | | | | | | |
| | | The NextDate function, | | | | | | |
| 5. | 5. 9/9/2025 The Foodies-Wish- List Online Shopping Application, | | | | | | | |
| 6. | 11/9/2025 | The Garage Door Controller, The currency converter, | | | | | | |
| | | Saturn windshield wiper. | | | | | | |

| 15/9/2025 | Boundary Value Testing: Boundary value analysis. | |
|------------|---|--|
| | Robustness testing, | |
| 16/9/2025 | Worst-case testing, Special value testing, | |
| 18/9/2025 | Examples, Random Testing, Guidelines for Boundary value testing. | Assignment- |
| 22/9/2025 | Revision of unit1 concepts | |
| | UNIT II | ı |
| 23/9/2025 | The Equivalence Class Testing, Decision Table-Based | |
| 25/0/2025 | | |
| | | |
| | | |
| 30/9/2025 | | |
| 6/10/2025 | Equivalence Class Test Cases for the complete Order Method, | |
| 9/10/2025 | Edge Testing, Guidelines and observations. | |
| 13/10/2025 | Decision tables, Decision Table techniques, | |
| 14/10/2025 | Test cases for the triangle problem NextDate function | |
| 16/10/2025 | Cause and Effect Graph, Guidelines and observations. | Assignment- |
| | UNIT III | |
| 21/10/2025 | Code based testing Program Graphs, | |
| 23/10/2025 | DD paths, Code coverage metrics, E. F. Miller's Coverage Metrics, | |
| 27/10/2025 | Basis path testing, guidelines and observations. | |
| 28/10/2025 | Testing Object-Oriented Software: Unit Testing Frameworks, | |
| 30/10/2025 | Mock Objects and Automated Object Mocking, Data Flow Testing, | |
| 3/11/2025 | Definition-Use testing, Define/Use Testing, | |
| 4/11/2025 | Examples, Object-Oriented Complexity Metrics, | |
| 6/11/2025 | Issues in Testing Object-Oriented Software, Slice-Based Testing, | |
| 10/11/2025 | Revision of unit3 concepts | |
| | UNIT IV | |
| 11/11/2025 | Beyond Unit Testing: Life Cycle-Based Testing, Traditional Waterfall Testing, | |
| 13/11/2025 | Testing in Iterative Lifecycles, | |
| 17/11/2025 | Agile Testing, | |
| 18/11/2025 | Software Testing Integration Level: Software Testing Fundamentals, | |
| | | 1 |
| | 16/9/2025 18/9/2025 22/9/2025 23/9/2025 25/9/2025 29/9/2025 30/9/2025 6/10/2025 13/10/2025 14/10/2025 16/10/2025 23/10/2025 23/10/2025 23/10/2025 30/10/2025 30/10/2025 11/11/2025 11/11/2025 13/11/2025 11/11/2025 | Robustness testing, 16/9/2025 Worst-case testing, Special value testing, 18/9/2025 Examples, Random Testing, Guidelines for Boundary value testing. 22/9/2025 Revision of unit1 concepts UNIT II 23/9/2025 The Equivalence Class Testing, Decision Table-Based Testing: Equivalence classes, 25/9/2025 Traditional equivalence Class Testing, 29/9/2025 Improved Equivalence Class Testing, 29/9/2025 Equivalence test cases for the triangle problem, NextDate function, 6/10/2025 Equivalence Class Test Cases for the complete Order Method, 9/10/2025 Decision tables, Decision Table techniques, 14/10/2025 Test cases for the triangle problem NextDate function 16/10/2025 Cause and Effect Graph, Guidelines and observations. UNIT III 21/10/2025 Code based testing Program Graphs, 23/10/2025 DD paths, Code coverage metrics, E. F. Miller's Coverage Metrics, 27/10/2025 Basis path testing, guidelines and observations. 28/10/2025 Testing Object-Oriented Software: Unit Testing Frameworks, 30/10/2025 Mock Objects and Automated Object Mocking, Data Flow Testing, 3/11/2025 Definition-Use testing, Define/Use Testing, 4/11/2025 Examples, Object-Oriented Complexity Metrics, 6/11/2025 Issues in Testing Object-Oriented Software, Slice-Based Testing, 10/11/2025 Revision of unit3 concepts UNIT IV 11/11/2025 Testing in Iterative Life Cycle-Based Testing, Traditional Waterfall Testing, 13/11/2025 Testing in Iterative Lifecycles, 17/11/2025 Agile Testing, 18/11/2025 Software Testing Integration Level: Software Testing |

| 34. | 18/11/2025 | Artificial Intelligence and Regression Testing, | |
|-----|------------|---|--|
| 35. | 20/11/2025 | Integration Testing in the OO Context, | |
| 36. | 24/11/2025 | Validation Testing, Testing patters. | |
| | | UNIT V | |
| 37. | 25/11/2025 | Automation Testing Tools: | |
| | | Selenium-Open-source tool for automating web browsers, | |
| 38. | 27/11/2025 | Katalon Studio Automation tool supporting web, API, | |
| | | mobile, and desktop apps. | |
| 39. | 1/12/2025 | Appium – Open-source tool for mobile application testing. | |
| 40. | 2/12/2025 | Apache JMeter – Open-source tool for performance and load | |
| | | testing. | |
| 41. | 4/12/2025 | JUnit – Popular unit testing framework for Java. | |
| 42. | 8/12/2025 | TestSigma - NLP-based test creation, self-healing tests, | |
| | | impact analysis | |
| 43. | 9/12/2025 | Revision | |
| 44. | 11/12/2025 | Discussion of last year SEE question paper | |

Important Dates to be remembered:

| Sl. | Important Events | Date | | | | | | |
|-----|------------------------------------|--------------------------------------|--|--|--|--|--|--|
| No. | | | | | | | | |
| 1. | I – Test | 13/10/2025 - 18/10/2025 - 25/10/2025 | | | | | | |
| 2. | Last date for dropping of course | 21/10/2025 | | | | | | |
| 3. | II – Test | 15/11/2025 - 29/11/2025 - 06/12/2025 | | | | | | |
| 4. | Last date for withdrawal of course | 1/12/2025 | | | | | | |
| 5. | Last working day | 13/12/2025 | | | | | | |
| 6. | Preparation Holidays | 14/12/2025 - 19/ 12/2025 | | | | | | |
| 7. | Semester end examination | 20/12/2025 - 5/1/2026 | | | | | | |
| 8. | Announcement of results | 17/1/2026 | | | | | | |

Activities to meet Teaching Learning Scheme:

| ACHV | nies to meet Teaching Leafning Scheme. | | | | | | | |
|------|--|------------|--|--|--|--|--|--|
| Sl. | Activity Planned | Number of | | | | | | |
| No. | | Hours | | | | | | |
| 1. | Class Room Teaching | 42 | | | | | | |
| 2. | Lab Related Activities | 28 | | | | | | |
| 3. | Formative Assessment [Test (2 No.) +Quiz (2 No.) + Semester End Exam] | 07 | | | | | | |
| 4. | Student Study Hours—Self Learning | 14 | | | | | | |
| 5. | Activity Based Learning: | 17 + 6 + 6 | | | | | | |
| | 1. Activity: Completion of the MOOC course from Infosys Springboard | = 29 | | | | | | |
| | (17 Hours) | | | | | | | |
| | 1. A course Titled "Automate Software Testing with Python" | | | | | | | |
| | Level: Intermediate, | | | | | | | |
| | Duration: 14 hours | | | | | | | |
| | Course contents: | | | | | | | |
| | i. Working with REST APIs and web applications, and | | | | | | | |
| | technologies such as Unittest, | | | | | | | |
| | ii. Postman and Selenium WebDriver. | | | | | | | |
| | 2. Meeting and discussing the progress and doubt clearing session.2 Hours. | | | | | | | |
| | 3. Evaluation and Presentation of knowledge gained and submitting the | | | | | | | |
| | certificate - 1 Hour. | | | | | | | |
| | | | | | | | | |

- 2. Activity: Writing Assignment with Problems on Software Testing test case generation and concepts. (6 Hours)
 - 1. Submission of the final assignment and evaluation. (Questions of Blooms level L3 and Higher)
- **3.** Case Studies for Automation Testing Tools (6 Hours)
 Evaluation: Submission of report and presentation of any case studies used in industries.

Textbooks:

- 1. Software Testing, A Craftsman's Approach, Paul C. Jorgensen and Byron DeVries, CRC Press, 5th Edition, 2021.
- 2. Software Engineering A Practitioners approach, Roger. S. Pressman, Bruce R. Maxim, Tata-McGraw Hill. 9th Edition, 2020, (Unit V)

Course Outcomes: Upon completion of this course, the student will be able to:

| | · · · · · · · · · · · · · · · · · · · |
|-----|--|
| CO1 | Illustrate the fundamental concepts, objectives, and importance of software testing in the |
| | software development lifecycle. |
| CO2 | Distinguish between different levels and types of software testing and apply appropriate |
| | techniques for various testing scenarios. |
| CO3 | Design, develop, and execute effective test cases and test plans based on software |
| | requirements. |
| CO4 | Apply different testing methodologies used in industries for software testing. |
| | |
| CO5 | Analyze and use manual and automated testing tools to efficiently perform functional and |
| | non-functional testing. |

Mapping of Course Outcomes (COs) to Program Outcomes (POs) & Program Specific Outcomes (PSOs)

| Course | Pos | | | | | | | | | | | | | PSOs | | |

Course delivery methods, assessment tools and sample questions:

| CO1 | Illustrate the fundamental concepts, objectives, and importance of software testing in the software development lifecycle. |
|---------------------|--|
| Delivery Methods | Chalk and talk |
| Assessment Tools | CIE- Test 1, SEE |
| Sample Questions | Discuss the differences between testing and debugging? (PO1,L2,4M) How Functional testing is different from structural testing? How does the software organization handle each of these activities? (PO1,L1,6M) |

| CO2 | Distinguish between different levels and types of software testing and apply appropriate techniques for various testing scenarios. | | | |
|---------------------|---|--|--|--|
| Delivery Methods | Chalk and Talk | | | |
| Assessment Tools | CIE-Test 1, SEE | | | |
| Sample Questions | Generate the test cases for the Triangle Problem using Boundary value analysis method (PO3,L1,8M) Discuss the usage of equivalence class method to derive test cases with an example of nextDate problem. (PO2,L2,6M) Explain the differences between black-box testing, white-box testing, and grey-box testing. (PO2,L2,6M) | | | |

| CO3 | Design, develop, and execute effective test cases and test plans based on software requirements. | | | | |
|---------------------|---|--|--|--|--|
| Delivery Methods | Chalk and Talk | | | | |
| Assessment Tools | CIE: Test 2, SEE, Assignment | | | | |
| Sample Questions | Define a test case and a test plan. How do they differ? (PO2,L2,6M) List the essential components of a test plan as suggested by IEEE/Pressman. (PO1,L2,6M) Discuss the importance of prioritizing test cases during execution. Distinguish between unit testing, integration testing, system testing, and acceptance testing with suitable examples. (PO2,L2,6M) At which level of testing would you use stubs and drivers, and why? (PO2,L2,6M) | | | | |

| CO4 | Apply different testing methodologies used in industries for software testing. | | | | | | |
|---------------------|--|--|--|--|--|--|--|
| Delivery Methods | Chalk and Talk | | | | | | |
| Assessment Tools | CIE: Test 2, SEE, Assignment | | | | | | |
| | 1. Explain the difference between manual testing and automation testing. (PO1,L1,6M) | | | | | | |
| Sample Questions | 2. Give one example of an industry where performance testing automation is critical. (PO2,L2,6M) | | | | | | |
| | 3. List the advantages and disadvantages of automation testing in software industries. (PO1,L1,6M) | | | | | | |

| 4. | Give | one | example | of | an | industry | where | performance | testing |
|----|-------|-------|--------------|------|------|----------|-------|-------------|---------|
| | auton | ation | is critical. | (PC) |)2,L | 2,6M) | | | |

| CO5 | Analyze and use manual and automated testing tools to efficiently perform functional and non-functional testing. | | | | |
|---------------------|--|--|--|--|--|
| Delivery Methods | Chalk and Talk | | | | |
| Assessment Tools | CIE: Test 2, SEE, Assignment | | | | |
| Sample Questions | How can Selenium be used for automating functional test cases of a web application? (PO2,L2,6M) Describe how JMeter or LoadRunner is used for performance testing. (PO2,L2,8M) What role does Postman play in functional testing of APIs? (PO3,L4,6M) Which testing tools are suitable for mobile application testing (manual and automated)? (PO2,L2,6M) | | | | |

| | Part A |
|------------|--|
| Sl. No. | Lab Programs /Topics Covered |
| 1 | Design and develop a program in a language of your choice to solve the triangle problem defined as follows: Accept three integers which are supposed to be the three sides of a triangle and determine if the three values represent an equilateral triangle, isosceles triangle, scalene triangle, or they do not form a triangle at all. Assume that the upper limit for the size of any 12 side is 10. Derive test cases for your program based on boundary-value analysis and execute the test cases and discuss the results. |
| | Test Data: Enter the 3 Integer Value (a, b and c) Pre-condition: $1 \le a \le 10$, $1 \le b \le 10$ and $1 \le c \le 10$ and $a < b + c$, $b < a + c$ and $c < a + b$ |
| 2 | Design and develop a program in a language of your choice to solve the triangle problem defined as follows: Accept three integers which are supposed to be the three sides of a triangle and determine if the three values represent an equilateral triangle, isosceles triangle, scalene triangle, or they do not form a triangle at all. Assume that the upper limit for the size of any side is 10. Derive test cases for your program based on equivalence class partitioning, execute the test cases and discuss the results. |
| | Test Data: Enter the 3 Integer Value (a, b and c) Pre-condition: $1 \le a \le 10$, $1 \le b \le 10$ and $1 \le c \le 10$ and $a < b + c$, $b < a + c$ and $c < a + b$ |
| 3 | Design and develop a program in a language of your choice to solve the triangle problem defined as follows: Accept three integers which are supposed to be the three sides of a triangle and determine if the three values represent an equilateral triangle, isosceles triangle, scalene triangle, or they do not form a triangle at all. Assume that the upper limit for the size of any side is 10. Derive test cases for your program based on decision tables-based testing, execute the test cases and discuss the results. |
| | Test Data: Enter the 3 Integer Value (a, b and c) Pre-condition: $1 \le a \le 10$, $1 \le b \le 10$ and $1 \le c \le 10$ and $a < b + c$, $b < a + c$ and $c < a + b$ |

| 4 | Design, develop, code and run the program in any suitable language to implement the NextDate function. Analyze it from the perspective of boundary-value analysis testing, derive different test cases, execute these test cases and discuss the test results. |
|---|--|
| | |
| | Test data: Enter the date with month/ day/ year format. |
| _ | Pre-condition: Month 1 to 12, Day 1 to 31 and Year 1812 to 2014 |
| 5 | Design, develop, code and run the program in any suitable language to implement the NextDate function. Analyze it from the perspective of Equivalence partition testing, derive different test cases, execute these test cases and discuss the test results. |
| | Test data: Enter the date with month/ day/ year format Pre-condition: Month 1 to 12, Day 1 to 31 and Year 1812 to 2014 |
| 6 | Design, develop, code and run the program in any suitable language to implement the NextDate |
| | function. Analyze it from the perspective of decision table-based testing, derive different test |
| | cases, execute these test cases and discuss the test results. |
| | cases, execute these test cases and discuss the test results. |
| | Toot data: Enter the data with month/day/year format |
| | Test data: Enter the date with month/ day/ year format Pro condition: Month 1 to 12. Day 1 to 31 and Year 1812 to 2014 |
| 7 | Pre-condition: Month 1 to 12, Day 1 to 31 and Year 1812 to 2014 |
| ' | Design, develop, code and run the program in suitable language: |
| | Foodies-Wish-List is an online shopping service for extremely rare gourmet foods. It can be |
| | used either on a one-time basis as a guest, or repeatedly by members. There is no initial cost for |
| | either category, but to be a Foodies-Wish-List member, one must register with customary |
| | information, such as: |
| | Member name, address, shipping address, telephone number, email address, preferred |
| | payment method, member credit card and PayPal Registered Foodies-Wish-List |
| | members receive discounts based on the price of an individual order as follows: |
| | a) orders less than \$200 receive no discount. |
| | b) orders between \$200 and \$800 (inclusive) receive a 10% discount. |
| | c) orders over \$800 receive a 15% discount. |
| | There is no discount for any guest order. |
| | Foodies-Wish-List members receive free shipping on any order over \$200. For orders less than |
| | \$200, there is a standard shipping price of \$5.00. |
| | Analyze it from the perspective of boundary-value analysis testing, derive different test |
| | cases, execute these test cases and discuss the test results. |
| 8 | Design, develop, code and run the program in suitable language: |
| | Foodies-Wish-List is an online shopping service for extremely rare gourmet foods. It can be |
| | used either on a one-time basis as a guest, or repeatedly by members. There is no initial cost |

Analyze it from the perspective of decision table-based testing, derive different test cases, execute these test cases and discuss the test results. |
| | Part B |
| | Automation Testing |
| 1. | Automate basic browser interactions and validate webpage behavior Selenium |
| ## | Automate web and mobile testing using a GUI-based tool Katalon Studio - Cross-platform |
| 2. | |
| 3. | Automation. Automate a basic user interaction (login form) in a native Android application using Appium. |
| 4. | Simulate load on web servers and analyze performance using Apache JMeter - Performance |
| | Testing tool. Write and run unit tests for Java applications using JUnit – Java Unit Testing Framework |
